Welcome Nolan,

You've successfully received sandbox access to the Veteran Service History and Eligibility API!

**Your OAuth client ID is:**

00a18821q3rNBWadf2p8

**Your OAuth client secret is:**

DYy1lNTpqDv1K606sIgdzcyfIVXS8qG1Kda8H1bC3BoKc7LGL9RrRvqjXZ34faTk

**Your redirect URI is:**<http://127.0.0.1:8080/oauth/callback>**Your link to access all test data for this API is:**<https://developer.va.gov/explore/api/veteran-service-history-and-eligibility/test-users/5583/fc3f474120f676f5fad6f4b76339d7e006c165c3c81f0719b91de658177b72a8>

---

## What's next?

### 1. Start developing.

- You have access to API test data anytime at [developer.va.gov](https://developer.va.gov).
- In order to test with this API using Authorization Code Grant, you will need login credentials tied to specific test user accounts. To access these additional test user credentials, you'll need to use the [unique link](#) included in this email.
- We recommend bookmarking the test data page after using the link - your access to these credentials will be saved, and the link will not expire. This way, you can easily return whenever you need full test data access.

### 2. Request production access

Once you've developed and tested your app in sandbox, you can [request production access](#).

**Important:** To get production access for this API, you must either work for VA or have specific VA agreements in place.

**Need help?**

If you have any questions about VA APIs or the sandbox or production access process, please don't reply to this email. It will be sent to an address that's unmonitored. Instead, [open a support ticket](#).
